LOGO VARIANTS

Dark & Light Logos

Navy logo on light backgrounds
Use on Pearl White · Soft Silver · Cloud Gray

Light/silver logo on dark backgrounds
Use on Building Navy · Deep Structure Navy

Navy logo on light. Light/silver logo on dark. Never light-on-light or dark-on-dark.

Logo System

CLEAR SPACE

1X = height of the building-B mark (~25% of logo height) . Maintain on all four sides.

MINIMUM SIZE

Keep the gold windows legible. Below 40 px the mark becomes too small for screen.

Usage rule

Never recolor, distort, rotate, or change the gold bars/windows.

APP ICON MARK

The building-B mark on a navy rounded-square — the app icon for iOS and Android.

No wordmark text inside the icon. Gold windows preserved.

Splash Screen

A calm, premium entry

The splash communicates trust and quality before the app loads. Navy gradient conveys depth; the faint gold glow frames the mark; the progress bar is one thin line — minimal and purposeful.

- Navy gradient: #16293B → #0A111A at 170°
- Centered white/silver logo · brand name · tagline
- Gold progress indicator — 2 px, linear gradient fill
- Window-grid motif at 4.5% opacity on-screen only

Brand Rules

Do

- Use navy base + one gold accent per section or page.
- Use the correct logo variant — navy on light, silver on dark.
- Maintain ≥ 1X clear space around the logo on all sides.
- Be bilingual — Arabic RTL, alt text, full layout parity.
- Use generous negative space. Let the layout breathe.
- Keep "Building Suit" in Latin in every bilingual context.

Don't

- Use multiple gold accents in the same section.
- Recolor, distort, rotate, stretch, or add effects to the logo.
- Change or recolor the gold bars/windows in the mark.
- Use gold for small body text on light backgrounds (fails WCAG AA).
- Create cluttered, hype-heavy, or crowded layouts.
- Invent new colors outside the approved token set.
